

NHTSA School Bus Course: Train the Trainer session @ KIM 2010

For CPTSs who are not specifically school transportation personnel
6 CEUs

Topics to be covered from the curriculum:

- The school bus environment
- Seat belt systems on school buses
- Conventional child safety restraint systems
 - RF and FF use (shorter version than full course)
 - Installation in school buses
- School bus-specific and similar products
 - Safety vests, add-on seats, and integrated bus seats
 - Usage and installation
- Hands-on practice installing in school bus environment
(Increased hands-on time)
- Special needs considerations
- Emergency evacuation

Added for train-the-trainer session:

- The CPS Technician working with school districts
 - Interaction with school transportation personnel
 - Opportunities to assist
- Teaching the NHTSA course
